J. Lee and R.I. Hollingsworth (East Lansing, MI, USA)

1 Réaction d'aldoses partiellement protégées avec des ylures d'arsenic stabilisés: synthèse de dérivés insaturés *E* acycliques et de dérivés *C*-glycosyle

17 Synthesis and evaluation of glucuronic acid derivatives as alkylating agents for the reversible masking of internucleoside groups of antisense oligonucleotides

25 Unusual lactam formation occurring in the synthesis of a biotinylated T-antigen-serine derivative

33 Synthesis of L-ribofuranosyl C-nucleosides

39 A simple access to lactose-derived building blocks required in glycoconjugate synthesis

51 Generation of molecular diversity on *N*-acetyllactosamine via *O*-cyanomethyl ethers

67 Structural elucidation of acidic fungal polysaccharides isolated from the cell-wall of genera *Cylindrocladium* and *Calonectria*

73 Anhydro sugar and linkage contributions to circular dichroism of agarose and carrageenan, with conformational implications

79 Structural characterisation of galactoglucomannan secreted by suspension-cultured cells of *Nicotiana plumbaginifolia*

93 Structure of a sulfated xylogalactan from the calcareous red alga *Corallina pilifera* P. et R. (Rhodophyta, Corallinaceae)

103 Confirmation and complete <sup>1</sup>H and <sup>13</sup>C NMR assignment of the structure of peptidoglycan from *Sarcina ventriculi*, a highly adaptable Gram-positive bacterium
